

QUARTERLY Rewind

Spring is upon us, and we are emerging out of the tight, allocated markets. Over the past year, we saw increased inventory builds, shifts in capacity, and end users exploring grade options to manage supply. As we continue to see changes in the paper market, we believe our supercalendered grades will be in significant demand in the second half of 2023 and beyond. That said, we can currently entertain new business that we previously could not support.

Check out our Artisan SCA++ and Prominence Plus SCA+ specifications sheets below. These grades are great alternatives to lightweight coated or coated groundwood papers. Please get in touch with your [Port Hawkesbury Paper Sales Representative](#) with inquiries or questions.

Minister Grants Wind Project Approval

Port Hawkesbury Paper, through its sister organization, Port Hawkesbury Paper Wind (PHP Wind), is building the 130-megawatt wind farm on lands in Guysborough County that are currently under sustainable forest management license to Port Hawkesbury Paper. The project will reduce the PHP facility's carbon footprint and help reduce energy costs to ensure a long-term future for one of the region's largest employers.

The Minister of Environment and Climate Change has granted approval for the Goose Harbour Lake Wind Farm Project. The rigorous Environmental Assessment (EA) process is complete and will review the document's recommendations and conditions to develop further work plans.

Enhance Your Bookazines with Port Hawkesbury's Supercalendered Papers

Bookazines can be even more effective when printed on high-quality papers like Port Hawkesbury's Artisan SCA++. Our Artisan paper is known for high gloss, smooth finish, and excellent printability, which can enhance the visual appeal of your bookazine and make it stand out on the newsstand. Supercalendered papers also offer exceptional runnability, which can help to speed up the printing process and lower production costs. By using Port Hawkesbury's supercalendered papers, you can create bookazines that are not only informative and engaging but also visually stunning and cost-effective. Contact us to learn how our papers can help take your bookazines to the next level.

Available Products

We have refined our product lines, focusing on SCA++ and SCA+ grades in 30# to 55# basis weights. Our SC products are comparable to coated groundwood papers and provide an effective alternative in many applications - sure to meet your most demanding needs. Looking for something specific? Check out our Artisan and Prominence Plus papers for more information.

Artisan

Artisan - SCA++

Our Artisan grade is a high-quality paper, perfect for catalogs, publications, and other commercial printing needs. It is made from premium quality wood fibers, which ensure that your printed materials have a smooth finish, sharp images, and vibrant colors. With Artisan, printed materials will stand out from the competition and make a lasting impression on your customers. [Get the specs.](#)

PROMINENCE^{plus}

Prominence Plus SCA+

Our Prominence Plus product is a premium supercalendered paper, ideal for high-end commercial printing. It is specially designed to handle heavy ink coverage, making it perfect for printing high-resolution images and graphics. With Prominence Plus, you can be confident that your printed materials will have a professional look and feel that will impress your customers and enhance your brand's image. [Get the specs.](#)
