

## QUARTERLY ⏮ Rewind

### PHP Wind Farm Takes Shape

Construction has ramped up through the summer at PH Wind's Goose Harbour Lake Wind Farm. The number of workers on site recently surpassed 100 people, with most of the current construction effort being focused on road and wind turbine pad construction. New culverts have been delivered to the site and are being installed according to the terms of our environmental permits.

Rebar, anchor bolts, and specialized formwork for the wind turbine foundations are being delivered. Wind turbine construction has begun with the pouring of the foundations. The pad shown is 92 feet wide, and over 120 cement trucks were used for the foundation.

Wind turbine blade fabrication has commenced, and we remain on schedule with turbine component manufacturing. The wind turbine package delivery to the Port of Mulgrave is expected to start by April 2026.

## How is PH Supercalendered Paper Different From Other Paper Grades

Port Hawkesbury Paper offers a wide selection of papers for catalogers, advertisers, publishers and printers looking for a premium quality paper. All Port Hawkesbury grades deliver on-press performance, high brightness, outstanding ink gloss, and an unbeatable print surface.

If you are new to Supercalendered Paper, take a read through our white paper on why you might choose SC paper for your next project.

Our supercalendered paper, often referred to as SC paper, is an uncoated, high-quality paper that is known for its smooth and glossy finish.

## Quality Paper for the Classroom

Our latest grade, Elevation Book, is designed for all kinds of publications, but works exceptionally well for educational texts and workbooks.

Elevation offers optimal opacity, superior printability, premium brightness, and is a sustainable choice. The enhanced fiber/clay matrix delivers outstanding print resolution and vivid color reproduction.
