

Environmental Policy

Port Hawkesbury Paper is committed to sustaining a healthy environment, both in our forests and at our facility. The natural resources entrusted to our company are managed for long-term sustainability and biodiversity while conserving the social and cultural values of the community.

We will meet, and strive to exceed, all applicable regulations, legal obligations and other requirements to which PHP subscribes. This includes setting appropriate environmental objectives and targets, creating applicable action plans, reviewing progress, conducting periodic reviews and annual updates, and making adjustments as required.

The company, through its employees, shall:

1. Develop and manufacture products and execute projects with respect for the environment, including Emergency Response Plans.
2. Utilize resources and supplies efficiently. Minimize energy and freshwater use. Commit to pollution prevention and long-term sustainability. Commit to long-term landscape ecosystem planning, soil and water conservation, waste reduction, and promoting applicable recycling in managing our environmental footprint.
3. Continually measure and regularly report on our environmental performance to the public.
4. Continually improve all aspects of our sustainability systems through experience and research. Provide appropriate training to employees and contractors in relevant environmental aspects of their work.
